

Infosys cobalt | Infosys topaz **INFOSYS LIVE ENTERPRISE APPLICATION DEVELOPMENT PLATFORM**

To survive and grow in today's competitive market, an enterprise must be responsive, adaptive, intuitive, and sentient just like a living being – a 'Live Enterprise' in the true sense. Unfortunately, enterprises are often held back by rigid legacy applications and complex data architectures. Hence, modernization of applications becomes a top priority.

However, modern architectures can be complex with many moving parts and underlying technologies that need to be integrated. Enterprises also struggle with the breadth and depth of specialized skills needed at every stage of the lifecycle. As a result, there is a significant increase in the time and cost of digital transformation projects.

### Infosys Solution

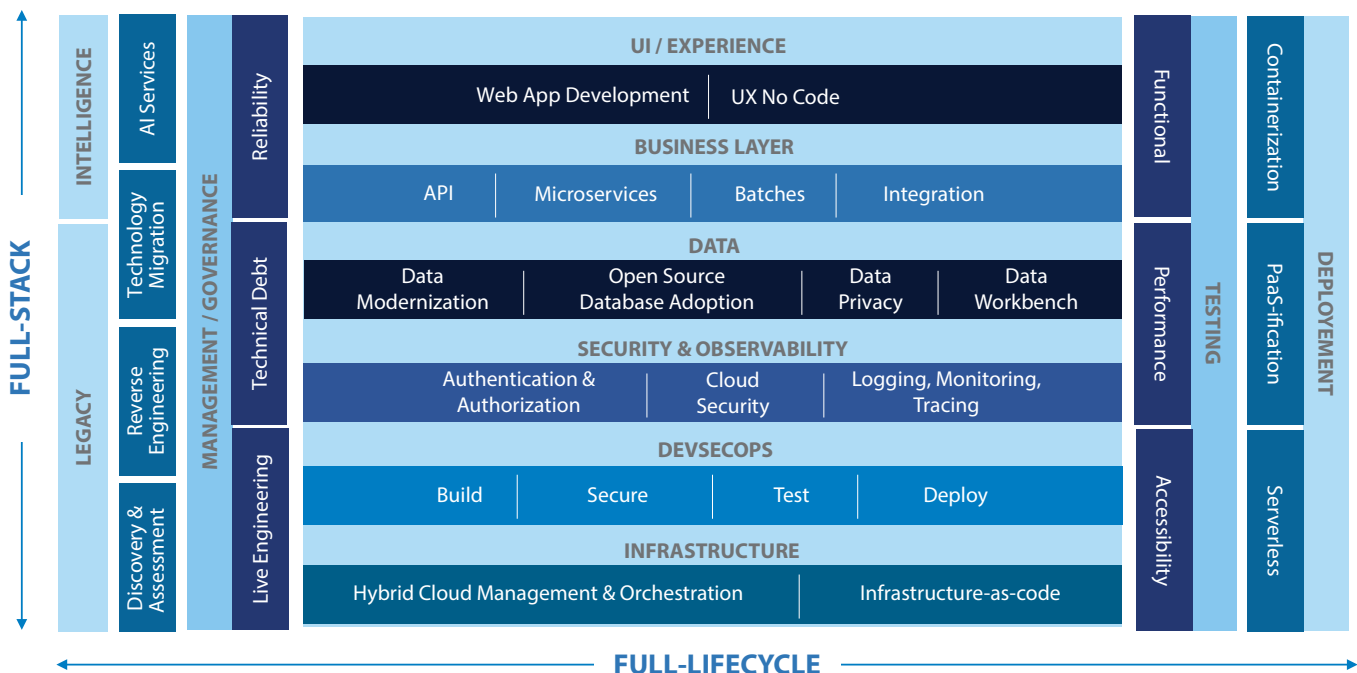

The Infosys Live Enterprise Application Development Platform, part of [Infosys Cobalt](#), simplifies and accelerates the application modernization and development journey. It harnesses our experience of over 10,000 modernization programs for more than 600 clients to drive hyper-automation with built-in standards and best practices at every stage.

The platform provides guided workflows and AI-enabled tools to abstract the complexity of underlying technology, boosting developer productivity. It unlocks information from legacy systems, simplifies decision-making, and reduces dependency on niche skills, saving effort and enabling faster time-to-market. It also integrates with disparate ALM tools for data-driven insights that help improve sprint velocity, release predictability, and product quality.

It offers a seamless developer experience across five integrated themes powered by [Infosys Topaz](#) to provide hyper-productivity across the software lifecycle.

	<b>Cloud-Native Development</b> Build resilient, performant applications
	<b>Cloud Modernization</b> Migrate and modernize applications on cloud
	<b>Database Modernization</b> Adopt open source and cloud databases
	<b>Legacy Modernization</b> Rehost or re-engineer legacy applications
	<b>Application Maintenance</b> Analyze, upgrade, modernize & maintain applications

The platform covers the complete technology stack and all application lifecycle stages.

## Benefits

 <b>Efficiency</b> Up to 40% reduction in development and testing effort	 <b>Agility</b> Up to 25% faster time-to-value	 <b>Quality</b> Zero technical debt and adherence to best practices	 <b>Simplicity</b> Abstracts complexity of underlying technology	 <b>Governance</b> Data-driven insights for better release predictability

Visit our [website](#) to learn more about Infosys Application Modernization Services.

**Infosys Cobalt** is a set of services, solutions and platforms for enterprises to accelerate their cloud journey. It offers over 35,000 cloud assets, over 300 industry cloud solution blueprints and a thriving community of cloud business and technology practitioners to drive increased business value. With Infosys Cobalt, regulatory and security compliance, along with technical and financial governance comes baked into every solution delivered.

**Infosys Topaz** is an AI-first set of services, solutions and platforms using generative AI technologies. It amplifies the potential of humans, enterprises and communities to create value. With 12,000+ AI use cases, 150+ pre-trained AI models, 10+ AI platforms steered by AI-first specialists and data strategists, and a 'responsible by design' approach, Infosys Topaz helps enterprises accelerate growth, unlock efficiencies at scale and build connected ecosystems.
