

# INFOSYS ESG REPORTING SOLUTION

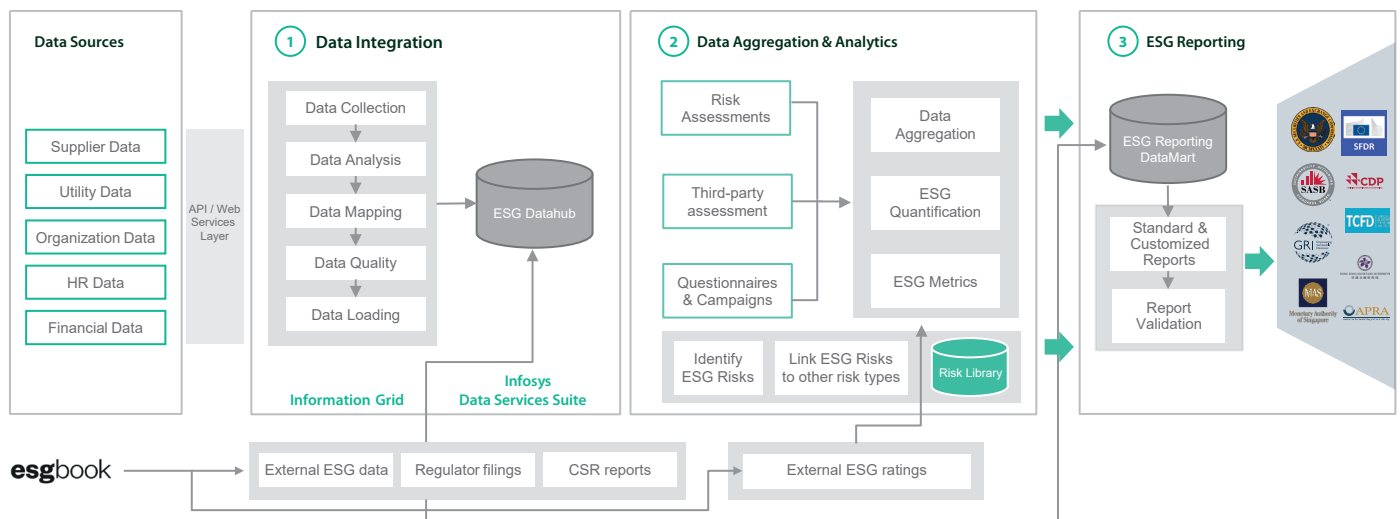

**Environmental, Social and Governance, or ESG as its widely known, is the new paradigm in the constantly evolving ways of evaluating businesses. Investor and stakeholder expectations are shifting with an increasing focus on ESG. With the sharp rise in ESG regulations, particularly in Banking and Financial Services (BFS) firms, this has brought ESG reporting to the forefront of the disclosures and reporting landscape.**

In response, businesses must rapidly transform to be able to report ESG metrics, whether voluntary or regulation mandated. Infosys can help make this transformation a reality for BFS firms by navigating the complex world of ESG and the different ways to analyse, measure and report metrics. While eventually this needs to be embedded in the strategic fabric of companies, Infosys FS ESG Reporting Solution can provide the head-start required to get there. Not only does this de-risk BFS enterprises in terms of future market position and financial performance, but also ensures top-line growth for the brand by enabling the shift towards becoming holistically sustainable.

## What Infosys Offers

### End-to-end Solution Stack

The Infosys FS ESG reporting solution stack is designed to enable transformation at speed and scale.

### Data Services

Sourcing best quality data in ESG systems for meaningful results and retaining the source of truth for ESG data

ESG Data Integration to streamline data capture and implement quality control

ESG Data Hub which assists in data mapping, transformation, and aggregation

Infosys proprietary accelerators to support data services

### Data Analytics and Computation Hub

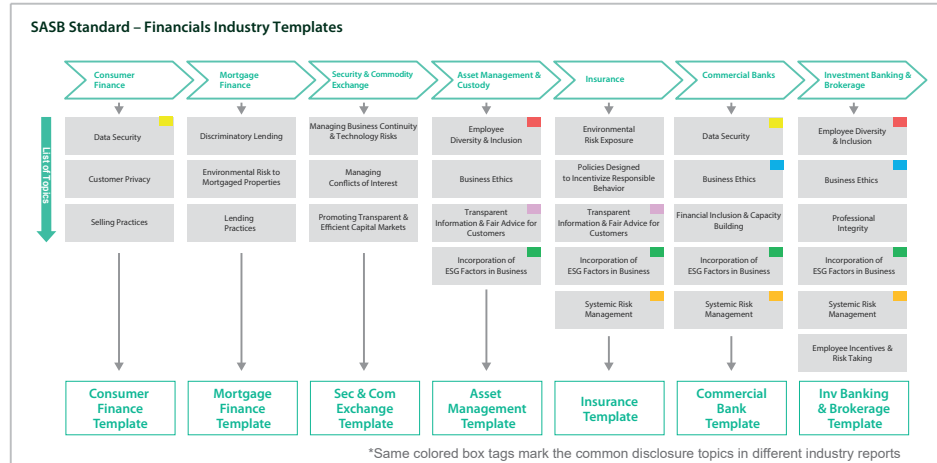

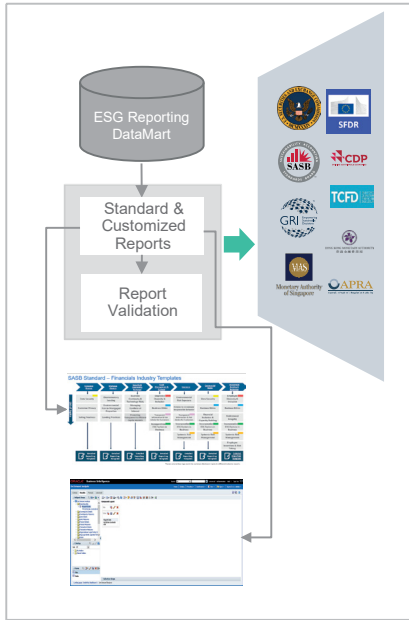

Maintain and manage ESG risks/opportunities, third-party ESG standing and various ESG metrics

Capability to perform ESG risk assessments, run questionnaires and campaigns, ESG quantifications, identify and store risks, link ESG risk types and risk issues to policies and goals, and much more!

Sourcing external ESG risk and sustainability ratings

# ESG Reporting

Generate both standardized and customized reports where standardized reports ensure compliance to existing standards such as TCFD, SASB and GRI.

|                                    |  |                                   |
|------------------------------------|--|-----------------------------------|
| Centralized master FS ESG data hub | Risk framework                               | ESG reporting repository          |
| Risk scenario analysis             | Real time ESG risk intelligence              | Auto-generated disclosure reports |
| Drill-down view                    | Content integration with third party systems | Intuitive user interface          |
| Dashboards & reports               |  |                                   |
