TRANSFORMING IT WITH CLOUD

Cloud is transforming the way enterprises are doing business today. They are increasingly adopting cloud to increase agility to support business, reduce IT costs and drive innovation by enabling new revenue streams. However, as they integrate and manage cloud with their IT landscape, they need to address an array of challenges such as orchestration of applications and data securely between private cloud, public cloud and on-premise IT environments, vendor & technology 'lock-in', in-adequate enterprise wide governance and visibility. It is critical for enterprises to keep a holistic view of the services available across the cloud ecosystem, and to control the IT resources in order to retain the flexibility to choose best-in-class cloud services.

Infosys® | IMS Suite — Your gateway to build, manage and govern an enterprise cloud ecosystem

Infosys IMS Suite is the first solution that helps an enterprise build, manage and govern a unified hybrid cloud environment. It helps to rapidly create, adopt and govern cloud services across these three key spaces – *Private Cloud, Hybrid Cloud and Brokerage and Governance.*

Private Cloud Transformation

- Private cloud build
- Dynamic Provisioning of IaaS & VDI
- Service Monitoring and Dashboard

Brokerage and Governance

- Real-time brokerage decision support
- Unified Hybrid Cloud Services Catalog
- Subscription Management
- Integrated SLA Management to ensure QoS and Security
- Enterprise & Regulatory Compliance
- Metering / Billing, Chargebacks

Hybrid Cloud Adoption

- Single Pane of Glass for Cloud Ecosystem
- Secure integration of apps, data and processes across hybrid ecosystem
- Cloud Bursting

CASE STUDY

For leading energy management company, reduce costs by 30% and improve agility by 40% in Infra provisioning.

For a leading bank, extreme automation and private cloud set-up for savings up to 50% in IT costs.

For a leading telecom provider, the Web Portfolio Transformation Application stack provisioning time reduced to 12 hours.

~ **40%** Accelerate Time to Market

~ **20%** Improve Productivity

~ **30%** Achieve Cost Savings

Key Benefits

RAPID CLOUD ADOPTION	• Rapid deployment of Unified Private and Hybrid Cloud Ecosystem • Subscribe to enterprise cloud services through a unified self-service catalog
ENTERPRISE-WIDE DECISION SUPPORT	• Smartly assess and broker cloud services from across providers • Collaborate and deliver persona-based insights for informed decision-making
SINGLE WINDOW MANAGEMENT AND ASSURANCE	• Gain single-window access to operate and govern your entire cloud ecosystem • Optimize cloud setup with unified resource usage and consolidated billing

Case Study

**TRANSFORMING IT OPERATING MODEL FOR
A LEADING BANK IN EUROPE**

*A leading European bank wanted to save up to
50% in IT costs by creating a new IT operating
model for its biggest division - the retail banking
unit, comprising 2700 applications. They also
wanted to make align their IT audits to the new
retail banking regulations.*

*Infosys is their strategic partner responsible
for defining, building and executing this new IT
Operating Model. We are leveraging Infosys IMS
Suite to empower their IT as an "Internal Service
Broker", with access to fine-grained data on IT
consumption.*
